

# HEMP

## FLAX FIBRE FOR SEALING METAL THREADED CONNECTIONS.

### TECHNICAL SPECIFICATIONS

**Base:** flax fibre

**Colour:** Brown

### SHELF LIFE

At least 24 months. Store in a well-sealed packaging in a dry place at a temperature between +5°C and +25°C.

### PRODUCT DESCRIPTION

Flax fibre for sealing metal threaded connections.

### FIELD OF APPLICATION

For sealing metal threaded connections such as for water (central heating installations) and compressed air systems. To be used in combination with Griffon Silpat or Kolmat Fitterskit.

### PREPARATION

**Preliminary treatment:** Thoroughly clean and degrease surfaces.

### APPLICATION

#### Directions for use:

1. Apply hemp in screw thread (rotate with screw thread).
2. Apply paste generously and evenly on entire screw thread.
3. Assemble joint.

### TECHNICAL PROPERTIES

**Water resistance:** Very good

**Temperature resistance:** -20°C to +130°C.
